Harmonies and contrasts in evolution

The Caillou cupboard in the high and low version keeps the rounded corners and is presented in the new version with the base close to the ground.

Not one, but several coffee tables coordinated with different heights: Caillou coffee tables transform themselves thanks to the new graphics, from the grit variety to the floral one.

The warm accents of the wood meet in minimal design in the new Caillou bench: a versatile object that turns into a seat, a bench or a coffee table. Available in two heights and finishes, charcoal and ash.
